We are a fully insured, full service Audio Visual company, we like to think of ourselves as a "One Stop Shop," with a focus not only on the right equipment at the right price, but on personable service. From music festivals to corporate events, conferences, holiday celebrations, award ceremonies and so on, we can handle it all. We will work closely with you from your initial vision to delivery and production.

Audio Reinforcement

Spoken Word – Be heard clearly and transparently with state of the art equipment. If you want to move your audience, they need to hear you and be able to focus transparently on what your saying, not how it sounds.

Atmosphere systems – for when presented speech isn't the focus of the event. Our satellite systems are designed to allow people to converse comfortably but allow the audio programming to clearly enhance the environment with out being too loud or too quiet.

Entertainment systems – From Indoor intimate gatherings to outdoor ceremonies, festivals or other events, with AR Productions, your event will be a success. Your system will entertain your guests without shrieking or sounding muffled. The key to a successful celebration is clear, strong and intelligible sound.

Visuals

Presentation – Getting you the right powered and type of projector with out spending too much is our goal. How many attendees, the intended light level of the room with the presentation is underway, controlling the amount of light the projector puts out with varying light levels in the room for different presentations, indoor, outdoor, and so on are all considerations and our experience will get you what you need, with out waste.

Company logo displays – We offer entertaining ways to make your logo memorable

Projection Mapping – a cutting edge display of software technology to draw attention to your building, business, school, or public event. Ask us about how we are working to create custom architectural displays for indoor and outdoor projects.

Lighting

Indoor Architectural Accent – Indoor uplighting and gobos can transform your room from a myopic and plain space to a landscape of colour and textures. We also have the ability to project what ever you like on the walls. Ask us about custom gobos and how they can make your space unforgettable.

Outdoor Architectural Accent – The latest craze in visibly setting your buildings apart from competitors is outdoor architectural lighting with LEDs. These are permanent, weather proof, energy efficient, full colour lighting instruments, installed by licensed professionals with years of experience.

Function – Sometimes, all you need is a spot light or a single custom gobo with your companies logo. No job too small.

Entertainment – What sets AR Productions apart from our competitors is that our lighting designers and operators are trained musicians. This means that instead of automatic lighting that seems to represent a carnival more then a party, our lighting is a unforgettable performance, appropriately set to the mood of the event, moment to moment.

Highly Recommended

I have hired AR for production management of my lighting and visual design for all of my functions. They constantly have creative and innovative ideas to put on the best events possible. If you're looking for friendly and professional service look no further than Aspect Radio.

by *Shane Burke*, Charlton MA Professional and personable rolled into one

I recently hired AR Productions to handle the sound and music production at my wedding. They arrived early, stayed late and worked amazingly well with my guests. The sound was amazing quality so all of my guests could hear

the outdoor ceremony, they arranged to work in the sound to the videographer, and the DJ was a huge hit with all my guests both young and old. In addition to all of the great service and professionalism, they were able to provide their services at a great rate that fit within my budget. I would recommend them to ANYONE looking to hire a crowd pleaser.

by *Jenn*, Windsor, CT

professional, fast, creative team

If you want fast, professional and amazing sound and lighting services, look no further. AR Productions sets the bar very high. You ask for something and you get no shortage of professional services. Their lighting and visual designs are among the most creative I have seen in years. Great sound quality at loud volumes make for a fun and enjoyable experience. Also, they are a friendly lot of individuals. Make sure to book AR Productions for your next event. You won't regret it. by *Jonathan* , Boston, Ma.
